

# SOFÍA ZAMBRANO MERICQ

I am a Software Engineer, currently living in Barcelona. I am very keen on Front-end development and I have worked as such throughout my working career (since 2019). I really enjoy working in a multidisciplinary team to integrate design and achieve the best user experience to deliver it into a product. I work hard to have high standards and good practices at the level code. My main goal is to work using my skill set in a fun and challenging team, with professional growth opportunities.

## WORK EXPERIENCE

### SOFTWARE ENGINEER | FINTUAL

MAR 2022 - present

- investments mobile app standards improvements
- built Design System (DS) project: web components (React) and mobile components (React Native) for internal apps consumption
- deployed web and mobile storybook use cases for DS ease of use
- unit testing using Jest and React testing libraries
- collaboration with the design team using Figma (interface design tool)

### FULL STACK ENGINEER | NESTO

DEC 2020 - MAR 2022

- mobile app (Ionic) development for salary advances
- admin web app (Angular) development
- cloud functions building and maintenance in GCP
- non-relational database: Firebase NoSQL
